

AMENDMENTS TO THE CLAIMS

The listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Currently Amended) A pump enclosure comprising:

a base, a cover, a plurality of pillars detachably connected at one end thereof to the base and at the other end thereof to the cover, wherein at least one of the plurality of pillars comprises interconnected extrusions defining therebetween a housing; and

a pump control circuitry disposed in the housing for controlling a pump,
wherein at least one of the extrusions is profiled on an outer surface thereof to receive at least one pipe through which coolant fluid passes in use, the pipe extending outside the housing defined by interconnected extrusions and substantially in parallel with the pillar.

2. (Previously Presented) The pump enclosure according to claim 1 wherein the extrusions are formed from thermally conductive material to dissipate heat away from the pump control circuitry.

3. (Cancelled)

4. (Cancelled)

5. (Previously Presented) The pump enclosure according to claim 1 wherein the pump control circuitry comprises a printed circuit board assembly.

6. (Previously Presented) The pump enclosure according to claim 1 wherein one of the extrusions comprises an outer wall for the pillar, the outer wall including at least one aperture for receiving connectors to the pump control circuitry located within the housing.

7. (Previously Presented) The pump enclosure according to claim 1 wherein one of the extrusions comprises a plurality of projections for engaging correspondingly-profiled surfaces of the other extrusion to connect the extrusions together.

8. (Previously Presented) The pump enclosure according to claim 1 wherein the extrusions are formed from metal.

9. (Previously Presented) The pump enclosure according to claim 1 wherein the extrusions are formed from aluminium.

10. (Previously Presented) The pump enclosure according to claim 1 wherein the extrusions comprise a plurality of apertures for receiving bolt means for detachably connecting the pillar to the base and the cover.

11. (Previously Presented) The pump enclosure according to claim 1 wherein the pillars comprise corner pillars, and wherein one of the extrusions comprises a substantially L-shaped extrusion providing an outer wall for the corner pillar.

12. (Previously Presented) The pump enclosure according to claim 11 wherein the base comprises at least one metal extrusion.

13. (Cancelled)

14. (Previously Presented) The pump enclosure according to claim 12 wherein the base extrusion is profiled to receive a plurality of wheels for the enclosure.

15. (Previously Presented) The pump enclosure according to claim 12 wherein the base extrusion is profiled to receive one or more electrical cables.

16. (Currently Amended) The pump enclosure according to ~~any of~~ claim 12 wherein the base comprises a plurality of interconnected metal extrusions.

17. (Cancelled)
